

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of claims:

Claims 1-12. (Canceled)

Claim 13. (Currently amended) An as-manufactured multi-wall sack that comprises an inner pouch, ~~typically~~ made from a polymeric material, and an outer bag, ~~typically~~ made from a paper-based material, with the sack having a top end that (a) is open in the as-manufactured form of the sack so that the sack can be filled with product via the open end and (b) is formed so that it can be closed to form a top block end, and wherein, in the as-manufactured form of the sack, the sack comprises pressure adhesive that connects together the inner pouch and the outer bag at the open top end of the sack, and wherein the amount and/or the type of pressure adhesive is selected so that the adhesion of the inner pouch to the outer bag is greater on one of a front or a rear side of the sack than on the opposite side of the sack so that, as part of a sequence of steps to close the outer bag after a step of heat sealing the inner pouch closed, the front and rear sides of the outer bag can each be folded outwardly in opposite directions with the sealed inner pouch being selectively detached from one of the sides of the outer bag and being retained by the other side and folding outwardly with that other side.

Claim 14. (Canceled)

Claim 15. (Previously presented) The sack defined in claim 13 ~~or 14~~ wherein, in the as-manufactured form of the sack, the sack comprises heat-activated adhesive on

sections of the outer bag that adhere to other sections of the outer bag as part of the sequence of steps to close the outer bag.

Claim 16. (Previously presented) The sack defined in claim 15 wherein, in the as-manufactured form of the sack, the positions of the sections of the outer bag that carry heat-activated adhesive are selected so that the sequence of steps to close the outer bag where possible positions the heat-activated adhesive sections so that the sections do not overlie the inner pouch.

Claim 17. (Previously presented) The sack defined in claim 13, wherein said sack further comprises an "easy" open feature on the outer bag that facilitates opening the outer bag after it has been closed.

Claim 18-20. (Canceled)

Claim 21. (Currently amended) A filled and sealed bulk packaging sack formed by filling and closing the as-manufactured multi-wall sack defined in claim 13, ~~of~~ ~~18~~.

Claim 22. (Previously presented) The bulk packaging sack defined in claim 21, wherein said bulk packaging sack further comprises a vent seal to allow air to escape from the inner pouch after the inner pouch has been closed.

Claim 23. (Previously presented) The bulk packaging sack defined in claim 22, wherein the vent seal defines a tortuous flow path for air to escape from the closed inner pouch.

Claim 24. (Previously presented) The bulk packaging sack defined in claim 21, wherein said bulk packaging sack further comprises product identification coding applied to the inner pouch after filling the as-manufactured multi-wall sack with product and prior to closing the outer bag.

Claim 25. (Previously presented) The bulk packaging sack defined in claim 24, wherein said bulk packaging sack further comprises product identification coding on the outer bag.

Claim 26. (Canceled)
